

CYRUS

40 series

A new beginning...

“It fills me with immense pride to be part of the Cyrus story, one that now spans over 40 years of audio excellence. The core brand values of providing value for money with great sound quality achieved with good, solid engineering have never been so important to the team here. We continue to engineer and build in the UK as it allows us the best control over the entire process of bringing these products to the end customer. I sincerely hope that when you listen to any Cyrus product, you appreciate the skill, dedication and hard work that has gone into each one and it helps connect you to the music that you love.”

Nick Clarke, Managing Director

BUILDING A BETTER MUSIC EXPERIENCE

Introducing the 40 series

A brand-new range of home audio products announcing a new beginning in the story of Cyrus Audio. Recognised globally for being the original half-width audio brand, the 40 series proudly continues to embrace this unique and effective approach to product design. Focussed around four core models, the 40 series provides the listener with a streamlined premium audio experience that will fit seamlessly into the home of today's music lovers while offering an exceptional audio performance. Engineered from anodised aluminium and with all key components custom designed, the 40 series is proud to be made in Britain, the home of Cyrus.

40 AMP

INTEGRATED AMPLIFIER

Designed to be at the centre of your home audio.

Whether you are a digital or analogue fan, the 40 AMP was designed to be at the centre of your home audio and provide the perfect partner regardless of your preferred playback source.

Delivering the level of exceptional performance expected from today's music fans, this integrated amplifier has the capabilities to drive even the most demanding of loudspeakers. With 100 watts per channel into 6 ohms, and a generously over-specified power supply the 40 AMP is capable of reproducing the scale and drama of the musical performance in your own home.

INTEGRATED AMPLIFIER

KEY FEATURES

100W per channel in 6 Ω

ESS ES9039Q2M 32 bit DAC

5" Hi-Res colour TFT display

4 x Analogue Inputs

3 x Digital Inputs

Analogue Preamplifier Output

1 x Fixed Output

Remote Control

MM Phono Stage

HDMI eARC Input

Asynchronous USB-B Input

Class A/B Amplifier

40 PSU Upgrade Compatible

5 year warranty

40 ST

STREAMING MUSIC PLAYER

The world of digital music at your fingertips.

If your music is digital, then the 40 ST, our highest performing network streamer is the product for you. Powered by the user-friendly and popular BluOS hi-res streaming platform and presented in the sleek design of the 40 series aluminium chassis, you will experience your favourite music at up to 24-bit/192kHz at lightning-fast speeds across your home network with minimal lag and zero loss in sound quality.

The 40 ST is packaged with the new Cyrus remote but is ultimately controlled with the intuitive BluOS app, available for iOS, Android, Kindle, Mac or PC computers. Providing direct access to over 20 natively integrated streaming services, thousands of radio stations from around the world, and even your own music library on a network drive. The 40 ST also supports Roon, Airplay 2 and allows for MQA decoding.

40 ST

STREAMING MUSIC PLAYER

KEY FEATURES

- BluOS Hi-Res Streaming Platform
- ESS Sabre ES9039Q2M 32 bit DAC
- 2 x Line Level Analogue Outputs
- 2 x Digital Outputs
- 2 x Digital Inputs
- Full colour 5" TFT display
- Built-in WiFi antenna
- Lossless music up to 24-bit/192kHz
- USB-A Socket For Music Playback
- RJ45 Ethernet Socket For Wired Network
- Ethernet (GigE 1Gbps), Wi-Fi 5 (802.11ac, 2.4/5Ghz)
- App available on iOS, Android, Kindle, Mac or PC
- Apple Airplay2, Roon Ready &
- MQA Decoding Built-In
- 40 PSU Upgrade Compatible
- 5 Year Warranty

40 CD

INTEGRATED CD PLAYER

Enjoy your CD collection like never before.

The design of high-performance CD players has been one of our key disciplines for many years, and the results speak for themselves. We developed what we call 'servo evolution' nearly ten years ago, which focuses on extracting the data on the disc as accurately as possible the first time to create an almost silent noise-floor.

This has resulted in our CD players being used as a reference around the world, and the 40 CD continues to push the boundaries of digital playback with our latest integrated CD players boasting our most advanced DAC to date.

40 CD

INTEGRATED CD PLAYER

KEY FEATURES

ESS Sabre ES9039Q2M 32 bit DAC

Cyrus designed 'Read Once' Servo Mechanism

2 x Line Level Analogue Outputs

2 x Digital Outputs

High-Res 3.5" TFT Display

Edge to Edge Glass Front Panel

Switch mode power supply

40 PSU Upgrade Compatible

5 Year Warranty

The power supply has also been completely redesigned to minimise interaction between the complex mix of signals which includes fast digital audio, sensitive analogue audio, high current servo and system controls. By completely segmenting these circuits the digital control circuits run from a dedicated, high-efficiency supply, whilst other parts of the player are powered from an over-specified universal power supply. Nine individual stage regulators smooth and distribute power within the player according to demand, taking the overall performance of the 40 CD to another level.

Encased in the sleek design of the 40 series aluminium casing and finished in anodised brushed black with a 3.5" hi-resolution TFT display, the 40 CD really does offer fans of CD playback one of the best products on the market at any price.

40 PPA

PHONO PREAMPLIFIER

Your vinyl has never sounded this good.

Cyrus have been designing and building phono preamplifiers in the UK for a long time now, so when we say that the 40 PPA is our best yet, and one of the best in the market, we say it with confidence!

As with all 40 series products, we have completely re-imagined the design of the product and audio flow from beginning to end, carefully shielding the very sensitive signals from any interference.

40 PPA

PHONO PREAMPLIFIER

Connect up to 4 turntables

All inputs compatible with MC & MM cartridges

MC inputs configurable for gain, load and capacitance

Stereo output level meters with peak hold to optimise MC gain

Warp filter to reduce bass excursion on warped records

XLR balanced and RCA outputs

Ground lift switch to help eliminate ground hum problems

5" Hi-Res colour TFT display

Remote control operation

40 PSU Upgrade Compatible

5 Year Warranty

The 40 PPA enjoys a high capacity and very low noise DC power supply that enables the preamplifier to provide an extremely wide dynamic range ensuring extended signal levels long before clipping. Attention to circuit layout and component placement ensures a very low noise floor to further expand musical dynamics.

40 PSU

EXTERNAL POWER SUPPLY

Experience the clarity of real power

Power supply design has always been key to the overall performance of audio products and with the 40 PSU, we have delivered not only a product packaged within the sleek design of the 40 series aluminium chassis, but a new approach to providing clean and stable power for your compatible 40 series host product.

Incorporating its own on-board micro-processor, the 40 PSU communicates directly with the host product to consistently provide the best configuration of virtually noise-free power from a full range of digitally controlled voltage output levels.

KEY FEATURES

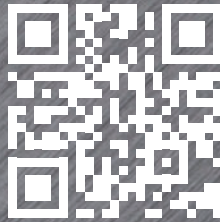

- 5 low noise linear supplies
- Compatible with 40 AMP, CD, ST & PPA
- Anodised aluminium casing
- Edge to edge glass front panel
- XR Series Compatible
- 5 Year Warranty
